

Aerial Work Platforms

Aerial Work Platform - There are various lift truck attachments existing on the market. They can help transform your lift truck so that you can expand your ability to pick stuff up or accomplish clean up jobs and material handling with greater ease.

A few accessories were specifically designed for the forks themselves. For example, fork extensions can be utilized if you require a lot more blade length, which increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are one more variety utilized if transporting rolled material so as to ensure it does not roll off of the typical flat blades.

Lifting accessories can be pivoting and telescoping crane attachments. They are available in numerous kinds. These attachments are often utilized for moving lumber, metal bars, poles or whatever type of bulky things. Other accessories such as various kinds of hook plates and hooks are existing so as to pick up items making use of a sling or chain. Magnetic lifters and slab lifters are other objects that could be utilized along with hook accessories. Slab lifters are specialized attachments which are intended for carrying a variety of materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which connect to your lift truck so as to make transferring rolls of carpet a lot easier. The attachment connects onto the forklift's blades and has a pole that goes through the middle of the carpet roll.

There are many types of forklift attachment intended for facility maintenance like for instance snow blades. These industrial blades can be attached to front end loaders and utilized for moving materials like for instance snow, dirt as well as mulch. Other common cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers consist of a broom which the forklift forks connect onto for sweeping big spaces like for instance parking lots or warehouse and factory floors. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up easy and fast.

A material spreader is another forklift attachment that is normally used at facilities. These spreaders are handy for various applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory that numerous companies utilize daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location utilizing the forklift. Larger platform units have added space for staff so as to bring tools and other necessary stuff for the job. Normally work platforms are constructed of steel or ploy material.
