The U.S. lift Truck division stationed in Cleveland has a expert team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original domestic lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national machinery expansion venture. Initial product sales of this industrialized equipment focused on large business communities, the armed forces and on state-run firms. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's superior technological improvements combined with sales success placed them in a situation of significant growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the highly competitive North American materials handling industry. This joint-venture proved highly lucrative for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added goods for export. In 1993, the corporation had a international sales system and started exporting designs they had developed through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas markets.
